

WILUBE CHEMICAL INC.

Wilube Lubricants for Metal Working

Wilube Chemical Inc. provides advanced, high quality lubricants and related products for the metal working industry, including fluids for Fin Stamping, Machining and Grinding, Stamping, Drawing, Cleaning, and Corrosion Prevention. In addition, Wilube supports Coil Forming and other industries with Oil Wiper Systems, Tooling, Parts, and Supplies.

For more than 50 years, Wilube has been a technology leader in its field. Whatever your metal working application, check Wilube's extensive line of lubrication solutions and related products.

Wilube offers a full range of lubricants designed to enhance tool life, cut costs, and preserve the environment for a variety of metal working applications, including **coil manufacturing** (fin presses, tube bending, tube expanding), **coiled metal and sheet metal working** (drawing, punch presses), **machining**, and **grinding**.

Wilube's products include Straight Oils, Soluble Oils, Synthetic Hydrocarbon Lubricants, Water-Based Lubricants, Evaporative Lubricants, and Hydrophilic Lubricants.

Wilube also offers lubricant wiping systems and tooling.
